

Highlights of the 2025-2026 Edition

International Construction Arbitration Handbook is a practice manual for advocates and arbitrators navigating the specialized field of international construction arbitration. This authoritative resource examines the distinctive characteristics of construction arbitration in an international context, addressing topics from arbitration agreements and tribunal selection to hearing procedures and award enforcement. The handbook delivers practical, construction-specific insights that complement general commercial arbitration knowledge.

Key updates to the 2025-2026 Edition of *International Construction Arbitration Handbook* include:

- Comprehensive updates throughout with each chapter refreshed to include enhanced commentary, expanded research references, and additional secondary source citations
- New case law summaries and discussion on drafting considerations for agreements to arbitrate international construction disputes (See §§ 2:8 & 2:25)
- Updated case law and discussion on the duties of the arbitral tribunal (See §§ 5:2 & 5:29)
- Significant revisions, including the addition of key secondary sources and important discussion to the chapter covering arbitral rulings and awards (See §§ 11:1, 11:3, 11:6 & 11:18).
