 - LCN and impact of cognitive bias on RFU thresholds, **8:23**
 - Misinterpretations, history of, **8:24**
- DNA transfer events. Transfer events, below
- Domain irrelevant information, residential effects, **8:46**
- Error. Mistake or error, below
- Every contact leaves a trace, **8:19**
- Examination of evidence, **8:7**
- Eyewitness memory, DNA exoneration cases, **9:16**
- Failure to consider the evidence, residential effects, **8:44**

DNA, FORENSIC USE OF—Cont'd

- FBI, fools, fraud and
 - Generally, **8:47 et seq.**
 - Incompetence and outright fraud, **8:54**
 - Juror tendency to harbor unrealistic confidence in crime labs, **8:52**
 - “Miracle” as contamination event, **8:53**
 - Murder weapon, failure to explore DNA from, **8:49, 8:50**
 - Presumed getaway vehicle, failure to explore DNA from, **8:48**
 - Recent developments, **8:55**
 - Residential effects in bungled investigation, **8:51**
- FBI Crime Lab
 - Faulty interpretations from, **8:42**
 - Residential effects, **8:45**
- Forensic biologists, **8:18**
- Fraud. FBI, fools, fraud and, above
- Fundamentals of assessing DNA mixtures, **8:25**
- Good intentions, failure of, **8:28 et seq.**
- Highly-publicized contamination of cold case evidence, **8:31**
- How DNA is used to investigate crimes, **8:3**
- Illumination, examination of evidence, **8:7**
- Incompetence and outright fraud, FBI, **8:54**
- Interpretations
 - Bias, interpretation of DNA challenges and impact of various forms of, **8:12**
 - Data interpretations, **8:11**
 - DNA mixtures, history of misinterpretations, **8:24**
 - FBI Crime Lab, faulty interpretations from, **8:42**
 - Relative fluorescence unit (RFU) thresholds, **8:11**
 - Substandard investigation and bad crime lab interpretations, **8:37**
- Interviews and investigations. Investigations, below

DNA, FORENSIC USE OF—Cont'd

- Investigations
 - Additional DNA inquiries, investigations which avoid, **8:14**
 - Bungled investigation by FBI, residential effects, **8:51**
 - How DNA is used to investigate crimes, **8:3**
 - Substandard investigations, below
 - Juror tendency to harbor unrealistic confidence in FBI crime labs, **8:52**
 - Lacking awareness of DNA contamination and corrective actions in crime labs, **8:30**
 - LCN. Low copy number DNA evidence, below
 - Likelihood ratio statistics, **8:36**
 - Limitations, misinterpretations, and misrepresentations, **8:33**
 - Locard's Principal, reality of DNA transfer events, **8:20**
 - Low copy number DNA evidence
 - Reporting conclusions, allelic dropout and DNA mixtures, **8:22**
 - The impact of cognitive bias on RFU thresholds, **8:23**
 - Microscopy, examination of evidence, **8:7**
 - "Miracle" as contamination event, FBI, **8:53**
 - Misinterpretation of DNA mixtures, history of, **8:24**
 - Mistake or error
 - Error rates and how errors manifest themselves in forensic DNA analysis, **8:35**
 - FBI, residential effects of bungled investigation by, **8:51**
 - Substandard investigation faulty analysis and, **8:38**
 - Molecular photocopier, goal of, **8:10**
 - Murder weapon, FBI's failure to explore DNA from, **8:49, 8:50**
 - Nobel Prize-winning work facilitating forensic human identification, **8:9**

DNA, FORENSIC USE OF—Cont'd

- Photography, examination of evidence, **8:7**
- Population statistical calculations, **8:26**
- Presumed getaway vehicle, FBI's failure to explore DNA from, **8:48**
- Prioritization of evidence, **8:6**
- Probabilistic genotyping software, recent developments in utilization of, **8:27**
- Processing of evidence
 - Generally, **8:6**
 - Prior to production of DNA typing data, **8:8**
- Prosecution and defense response to "we have DNA" claim, **8:39**
- Relative fluorescence unit (RFU) thresholds
 - Analytical artifacts and DNA data interpretations, **8:11**
 - The impact of cognitive bias on RFU thresholds, **8:23**
- Reporting conclusions from LCN DNA, allelic dropout and DNA mixtures, **8:22**
- Residential effects
 - Bungled investigation, FBI, **8:51**
 - Domain irrelevant information, **8:46**
 - Failure to consider the evidence, **8:44**
 - FBI crime lab, **8:45**
- Reversal of wrongful convictions, **8:17**
- RFU. Relative fluorescence unit (RFU) thresholds, above
- Scientific strategies of biological evidence/DNA examinations, **8:15**
- Searchable DNA databases, development of, **8:16**
- Sexual assault cases, DNA in, **8:43**
- Sources of DNA typically collected from crime scene, **8:4**
- Speculation as to how or how much DNA, **8:41**

INDEX

SEXUAL ABUSE EXAMINATION

—Cont'd

- Abnormal findings, normal and, **7:3**
- Absence of physical findings, **7:4**
- Basic anatomy and terminology, **7:10**
- Basic concepts, **7:1**
- Bayes' Rule
 - Generally, **7:20**
 - Data that cannot justify the conclusion, generally, **7:20-7:22**
 - Female child, **7:21**
 - Male child, **7:22**
- Beneficial knowledge, **7:8**
- Childhood sexual abuse. CSA examination, how to properly conduct, below
- Clinical history and documentation
 - General considerations, **7:24**
 - Legal considerations of history, **7:26**
 - Review of systems, **7:25**
- Collection of forensic evidence, **7:29**
- Conducting a full body examination, **7:27**
- CSA examination
 - Generally, **7:23 et seq.**
 - Clinical history and documentation, above
 - Full body examination, below
 - How to properly conduct, generally
 - Methodology of exam, **7:23**
- Data that cannot justify the conclusion, Bayes' Rule, **7:20-7:22**
- Definitive findings, **7:16**
- Dermatologic and related disorders, **7:12**
- Documentation. Clinical history and documentation, above
- Evidentiary issues with physical findings or their absence, **7:5**
- Female child, Bayes' Rule, **7:21**
- Findings, scholarly research regarding, **7:17**
- Full body examination
 - Generally, **7:27-7:29**
 - Collecting forensic evidence, **7:29**
 - Conducting the examination, **7:27**
 - Genital examination, **7:28**

SEXUAL ABUSE EXAMINATION

—Cont'd

- Genital examination, **7:28**
- Infectious disorders, **7:13**
- Interpreting medical findings in suspected sexual abuse, **7:9**
- Knowledge basics
 - Generally, **7:7-7:22**
 - Basic anatomy and terminology, **7:10**
 - Bayes' Rule, above
 - Beneficial knowledge, **7:8**
 - Definitive findings, **7:16**
 - Dermatologic and related disorders, **7:12**
 - Findings, scholarly research regarding, **7:17**
 - Infectious disorders, **7:13**
 - Interpreting medical findings in suspected sexual abuse, **7:9**
 - Language, scholarly research into children's, **7:18**
 - Minimum core content, **7:7**
 - Miscellaneous disorders, **7:14**
 - Normal variations, **7:11**
 - Probability and likelihood, **7:19**
 - Sexual abuse with no findings, **7:15**
- Language, scholarly research into children's, **7:18**
- Legal considerations of clinical history, **7:26**
- Male child, Bayes' Rule, **7:22**
- Methodology of CSA examination, **7:23**
- Minimum core content, **7:7**
- Miscellaneous disorders, **7:14**
- No findings, sexual abuse with, **7:15**
- Normal and abnormal findings, **7:3**
- Normal variations, **7:11**
- Probability and likelihood, **7:19**
- Proper conduct of CSA examination. CSA examination, above
- Purpose of exam, **7:6**
- Research
 - Children's language, scholarly research into, **7:18**
 - Findings, scholarly research regarding, **7:17**

SEXUAL ABUSE EXAMINATION
