

Introduction to the 2025-2026 Edition

This year's edition of Volume 14 of the Minnesota Practice Series includes updates to the law of property, custody and parenting time, child support, maintenance, and rules of practice. Updates have also been made throughout to account for continued developments in the case law and relevant statutes. Where possible, we have continued to build on the excellent work passed on to us by this volume's prior authors, while providing relevant updates as the practice of family law continues to evolve at a near breakneck pace. We are much indebted to them for the strength of this volume.
