PREFACE

WHAT'S NEW

This pamphlet contains major Environmental Law statutes which have been enacted by Congress in an effort to address the problems of pollutants in the air, water, land, food, and drugs. This edition is current through Pub.L. 119-4, approved March 15, 2025. The laws bear not only the title and section classifications of the United States Code Annotated, identical to that of the United States Code, but also their Congressional Act and section designations. Historical and statutory notes and additional annotative material are available in the corresponding sections of the United States Code Annotated.
