

Introduction to the 2026-2027 Edition

LICENSING LAW HANDBOOK

The *Licensing Law Handbook* is designed to provide licensing professionals with a quick reference guide for dealing with the creation, interpretation and enforcement of technology licenses. The federal and state laws controlling the creation and interpretation of licenses are discussed and updated. The related antitrust cases are reviewed and updated. Samples of different forms of license agreements are also included in the *Handbook*.

What's New in this 2026-2027 Edition

Revisions in the 2026-2027 Edition include, inter alia, the following:

- New chapter on role of artificial intelligence in licensing (see Chapter 13)
- New sample complaint for damages and injunctive relief for infringement of copyright in AI material (see Appendix L1)
- New sample AI usage policy (see Appendix G4)
- New sample publishing agreements containing ai provisions (see Appendix E10)
- New sample agreement for content as “work made for hire” utilizing artificial intelligence tools and procedures (see Appendix E11)
- New landmark complaint by NY Times for AI copyright infringement (see Appendix F3)

Thank you for subscribing to the *Licensing Law Handbook*. We work diligently each year to make the publication the most important resource available on this topic,

LICENSING LAW HANDBOOK

and we hope that you will find it invaluable for your practice.
