

Introduction to the 2026 Edition

For the 2026 Edition, the author-editor and contributing authors have revised a number of chapters in *eDiscovery for Corporate Counsel* addressing new technology, case law and the effects of the Federal Rules on ediscovery in the corporate sector. In addition to updates throughout the edition, highlights include:

- New § 7:16 Machine learning—Supervised learning/discriminate modeling
- New § 7:17 Machine learning—Unsupervised learning
- New § 7:18 Machine learning—Name entity recognition
- New § 9:14. Legal hold policies and procedures—Strategic preparation
- New § 12:4 Data collection—Data types
- New § 15:18 Privilege and generative artificial intelligence
- New § 15:19 Privilege and generative artificial intelligence—Feeding prompts and information into LLMs
- New § 15:20 Privilege and generative artificial intelligence—AI-powered notetaking and/or transcription
- New § 24:10 Artificial intelligence in discovery: Cost and defensibility
- Chapter 29. Bring Your Own Device or “BYOD” has been completely revised by new author Allison Day.

More information about the background of new authors can be found in the contributing author biographies below.

The author-editor hopes that this 2026 Edition of *eDiscovery for Corporate Counsel* serves you well.
